### TBI and psychiatric problems

**What is the relationship between TBI and other types of incident addictions?**
(e.g., Obesity and food addiction; gambling, pornography).

**How are TBI and addiction connected?**
- Do rates of alcohol and substance use increase or decrease after TBI?
- What are the neurological and clinic-demographic factors associated with decline in substance use after TBI?
- What is the relationship between TBI and other types of incident addictions? (e.g., obesity and food addiction; gambling, pornography)

**What type of childhood psychiatric problems predispose people to sustain TBI?** (e.g., ADHD, ODD)

**How is TBI treated or assessed differently in different races?** (e.g., Caucasians versus African Americans versus Asians)

**How is TBI treated differently in sports culture versus military culture?**

**What tools should be used early on in schools, pediatric office, jail to screen for TBI in persons with ADD/ADHD and how often should it be done?**

**What factors are associated with good outcomes after TBI?**
- Is having a “navigator” or a person who helps guide someone with TBI and the caregiver through the healthcare system effective?
- How do smart app therapies compare to traditional rehabilitation therapies in influencing outcomes?
- What is the effectiveness of alternative interventions such as yoga, exercise, diet, supplements, neurofeedback, homeopathy, or mindfulness training?
- What is the role of insurance in influencing outcomes?
- What is the role of socialization in influencing outcomes? What are the different strategies to improve socialization and what constitutes the best form of socialization — connecting with family/friends vs group therapy?

**What are the factors influencing neuroplasticity after TBI?**
Identification of biomarkers to improve effectiveness of medications in treatment of neuropsychiatric problems.

**What are the different types of, and most effective telemedicine therapies in managing neuropsychiatric symptoms after TBI?**

### TBI and culture

**How is TBI treated differently in sports culture versus military culture?**

**What is the role of insurance in influencing outcomes?**

**What personality characteristics of caregivers help optimize recovery?**

**What kind of support/strategies would help prevent/minimize caregiver burnout?**

**Is TBI treated or assessed differently in different cultures?** (e.g., Caucasian versus African Americans versus Asians)

### TBI and domestic violence

**How common is TBI in people with domestic violence and brain injury?**

**What are rates and assessment methods to evaluate for TBI in persons with suspected domestic violence, given that many do not disclose domestic violence?**

**How does TBI affect sexual functioning and sexuality?**

**What are the non-harmful and safe methods to express sexuality after TBI?**

### TBI and neuroplasticity

**What are the factors influencing neuroplasticity after TBI?**

**What are the factors influencing outcomes after TBI?**
- Is having a “navigator” or a person who helps guide someone with TBI and the caregiver through the healthcare system effective?
- How do smart app therapies compare to traditional rehabilitation therapies in influencing outcomes?
- What is the effectiveness of alternative interventions such as yoga, exercise, diet, supplements, neurofeedback, homeopathy, or mindfulness training?
- What is the role of insurance in influencing outcomes?
- What is the role of socialization in influencing outcomes? What are the different strategies to improve socialization and what constitutes the best form of socialization — connecting with family/friends vs group therapy?
